

Temptations Panels

*A brand new natural stone product
by*

Improving stone

I can resist everything except temptation.

Oscar Wilde

Temptations Panels are a new three-dimensional natural stone concept. By combining the latest technology with the newest trends in design, they provide an outstanding solution in order to obtain an unique and exquisite decor.

A whole new world of possibilities arises through visual and tactile effects on stone surface providing an endless range of creative options for designers, architects and clients. Temptations Panels can be customized to each project with different stones and finishes. New designs can also be suggested. The panels will get its potential enhanced by an appropriate lightning system, which will provide intriguing light and shadow effects.

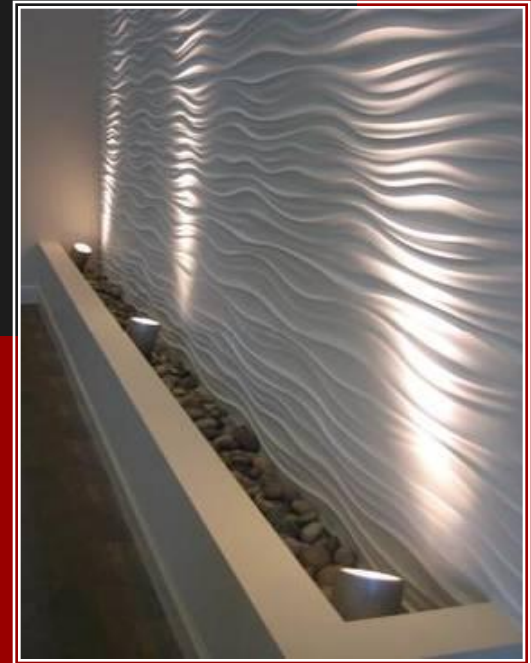

Made of natural stone - a noble, durable and healthy green material - Temptations Panels are suitable for both interior and exterior application being a premium choice for using in private residences, hotels, SPA's, bars, offices and restaurants, as wall panels, reception desks, washbasins and shower areas, fireplaces and anything else you can think of.

See our concept lines and enjoy all the potential of this new product.
